## Telva Exhibiting at SecD-Day 2025 in Helsinki

*The biggest defence and security exhibition in Finland in 2025 (and ever) is SecD-Day 2025 in Helsinki. The two-day show, from January 29<sup>th</sup> to 30<sup>th</sup>, will boast a record-breaking 160+ exhibiting companies spanning all sectors of defence and security. Telva, with its own Obsidian™ Limited Range IR Light and a number of principals, will be there.*

Telva has stepped up considerably in the recent years and today represents an impressive array of companies in the defence and security sectors. From being a supplier of high-quality vessels, maritime products and engines, Telva has developed into a trusted supplier and go-to partner in several key disciplines of the defence industry.

At SecD-Day, Telva will be exhibiting both its own production and some of its principals. The unique **Obsidian** light, an infrared illuminator with a controlled and limited range, has caused quite some commotion in specific defence communities throughout Europe during the past year. The light's unique properties have met an enthusiastic customer group in both specialised land force operators and vehicle manufacturers, as well as other army functions.

Telva principals exhibiting on Telva's stand at SecD-Day 2025 are:

**Exail** – robotics, maritime, navigation, aerospace and photonics technologies.

**MKU** – lightweight composite armour and soldier optonics.

**OSPL** – TEMPEST technology.

**Rheinmetall** (several divisions) – defence systems supplier.

**Tactiscan** – portable drug screening.

### *What is SecD-Day?*

In the words of Ms Tuija Karanko, Secretary General of the Finnish Defence and Aerospace Industries – PIA: "SecD-Day increases direct interaction between defence, security, space and aviation companies, as well as authorities. The new event was already well-received the first time it was organised, and it has every chance of growing into a significant event in the entire Northern European region. Moving to Helsinki Expo and Convention Centre and co-operating with the industry's leading event organiser enables long-term development and growth of the event."
